

YOUNG VICTORIA

A Journal of the

SCOTCH

COLLEGE.

No. 9.

MELBOURNE, DECEMBER, 1878.

Price 6d.

Shake hands, before you die.
Old year, we'll dearly rue for you:
What is it we can do for you?
Speak out before you die.

—Tennyson.

WHY should the fear of appearing trite deter us from the wholesome repetition of what is true? Although in the domain of science new facts and laws are being progressively evolved, the sum total of man's moral duty has received its complete and unalterable definition thousands of years ago; and the treasures of thought which the great and good of all times and countries have blessed us with are, rightly considered, nothing but the exposition, development and illustration of this definition. The essential conditions and circumstances of human existence undergo no variation, and the moralist's task is always intrinsically the same whatever external disguises it may assume. And, indeed, it is on account of this very unchangeableness of human nature that we are so strongly affected by the works of genius in which it

is delineated. The "old story" is the only effective one, the only one which can have any lasting interest for us. Well, the old story it is:—

Interea magnum sol circumvolvitur annum.

Once more Old Time has, with his usual regularity, all but completed another of his periodical revolutions, although he has not brought us to the point we started from; for, like a true wheel, Time not only turns, it also advances. Many, during the year, have made their final exit from this scene of turmoil, and many fresh arrivals have come to see if they can make anything satisfactory of it; much good has been effected, and much evil, both to leave their inevitable traces upon the future. Leaders of nations have wisely and patriotically expended their energies to uphold the honour and secure the prosperity of their country, and have treacherously abused their powers for their own selfish interests; men of learning and knowledge have nobly

employed their talents for the intellectual advancement of their race, and have basely used them as instruments of self-glorification and self-gratification; men of religion have, with heart and soul, worked for the spiritual welfare of their fellow-creatures, openly condemning, even to their own worldly disadvantage, superstition and intolerance, and have with lip-sanctity stifled conscience in pandering to bigotry for motives which were of the earth, earthy; men of commerce have carried on their affairs with careful integrity, and have, by a disregard of all principle, shaken public confidence, and cast into ruin and unutterable misery thousands of innocent families; teachers have been anxiously solicitous to promote the advancement of those entrusted to their supervision, and have been culpably perfunctory in the fulfilment of their duties; their pupils have shown themselves assiduous, obedient, and well-behaved, and have been idle, neglectful, and unruly. It is with this last item that our readers are more immediately concerned, and if they will be induced to examine conscientiously their past school career, and to determine impartially how far they have belonged to either of the above categories, our remarks will not have been entirely useless. Most of the characteristics of manhood are so many habits which have been formed in youth, and have become by degrees an integral part of the whole being. It is a proportion sum which there is no difficulty in working out, at least approximately. If the boy is obedient, what will the man be?—law-abiding. If the boy be disobedient, what will the man be?—lawless. If the boy is diligent and self-dependent, what will the man be?—industrious and successful.

If the boy is too idle to work himself, and ever ready to appropriate other boys' work, what will the man be?—a failure and dependent upon others, or even dishonest. The same rule may be applied to any extent, and will be found to hold good in all cases. If exceptions occur to any one, a little investigation will show that they arise either from unusual temptation or from timely warning and zealous self-amendment. The boy, it is said, is father to the man, and the remark is as true as it is beautiful.

If we write rather strongly, it is because we are deeply impressed with the importance of boyhood, with its potential energy, so to speak. It is made up of possibilities, and we think it a high duty to help in rendering these, if not excellent certainties, at least excellent probabilities. We should like boys to be possessed of a fair knowledge of the responsibilities devolving on them, and to have a little more regard for the future than they are usually disposed to have. It is not to be expected, nor is it by any means desirable, that young heads should be prematurely burdened with cares and anxieties, yet we know too much of the unavailing regrets which follow an idly and carelessly-spent youth not to take advantage of an opportune season like the present to remind our readers that they should make hay while the sun shines, in the best sense of the expression, and endeavour to acquire such habits of thought and action as will enable them to start in the race of life free from unnecessary impediments. They will find external obstacles and hindrances enough without bringing additional ones of their own.

Since our last valedictory College matters

have, in natural course, advanced a stage. Another step in the perpetual motion of continuous displacement has been taken. Boys of the first have become boys of the second or third, *prae*-*Matric.* has become *Matric.*, and this again has attained the dignity of *post*. Many have passed from our portals, and it gives us lively satisfaction to note that they are showing good promise in University and other work. Now, too, many are about to depart from among us to fulfil their destiny in the greater school of men—the common destiny of labour.

Der Mann muss hinaus
Ins feindliche Leben,
Muss wirken und streben
Und pflanzen und schaffen,

he must work and strive to obtain a firm footing among his fellows. Happy he who has been taught and who has learnt to look upon duty as a thing to love, not as a *saeva necessitas* with hateful clamps and horrid spikes. We know and appreciate the stuff our Victorian lads are made of, and we bid farewell to those leaving us, with a confidence in their future resulting from the experience of many years.

The College studies during the year have been in general brisk and satisfactory. Unflagging interest has been evinced in the results of the frequent examinations, which have thus proved a strong incitement to industry. In sports, also, the honour of the College has been satisfactorily upheld. It will thus be seen that the holidays have been well earned, and we are sure that the enjoyment of them will be commensurate with such previous diligence as may have been applied, for, as the poet says—

There is not a creature, from England's king
To the peasant that delves the soil,
That knows half the pleasures the seasons bring,
If he have not his share of toil.

We trust, therefore, that as our readers have mostly fulfilled the necessary condition, they will thoroughly and heartily enjoy the pleasures the season brings, and come back refreshed, with an increase of vigour, to enter sturdily upon next year's campaign.

1878.

SCHOOL and University work for the year is now over, and we are thus in a position to give a resumé of the results so far as the Scotch College is concerned.

Commencing with literary work, we find that twenty-four boys have passed the Matriculation, and twenty-eight the Civil Service Examinations, results which are relatively higher than any hitherto attained. It is worthy of notice that in Greek, English, and Euclid every candidate was successful, and that there was but one failure in each of the subjects, Latin, Arithmetic, and Geography. There were in all some 500 candidates, and the highest position on the whole list was gained by L. S. Jones, our dux of this year, who passed in nine subjects, and well in seven. This score has never been beaten, and was equalled only once, when J. A. Kennison, another Scotch College candidate, made a similar score

At the ordinary examinations twenty-four students from the College have been successful in their respective years, four in Arts, three in Laws, ten in Medicine, and seven in Engineering. Six others have been returned as passing in single subjects.

At the Honour Examinations ten have been successful in obtaining a place in the Honour List.

During the year six old pupils have been admitted as solicitors. Eight have had

degrees conferred on them, three graduating M.A., one M.B., three M.B. and C.M., two L.R.C.P. and L.R.C.S. Edinburgh, one L.R.C.P. Edinburgh, and one L.F.P.S. Glasgow. Three others have passed for degrees, one for B.A., one for LL.B., and one for LL.B. and M.A.

The list of former pupils who have this year passed examinations includes altogether seventy different names; and, besides these there are some at the home universities, concerning whom we have been unable to obtain information.

Coming to athletics, we find that the representatives of the College have again been very successful, and, as in 1877, we are in a position to state that, in the various interscholastic cricket and football matches, they have sustained no defeat. Full particulars as to the results of the examinations and of the games appear in this issue.

It would be too much to expect that our representatives will be always equally successful, but we trust that the results for this year will stimulate all to work so as to deserve success.

Notes and Comments.

THE College will reassemble on Tuesday, the 11th February. New Pupils will be enrolled at the College office on Monday, the 10th February.

OUR present issue contains the Honour List for the year, and the results of the University examinations and athletic contests.

THE Honour List contains the names of all boys who obtained an average number of marks, not less than the average obtained by the class. A comparison of the two averages affords the fairest means of estimating how a boy has done at the examinations. The names of boys who have not attained the class average in any subject do not appear in the Honour List, but their results will be forwarded to parents and guardians after the commencement of the holidays.

MR. ARCHIBALD GRANT BLACK, an old Collegian, has obtained the degree of M.B. and C.M. at Glasgow University. Mr. Black has also obtained the diploma of L.R.C.P. Edinburgh, and L.F.P.S. Glasgow. Mr. Black is a son of Mr. James Black of this city, and a brother of Dr. J. G. Black of Carlton.

MR. GEORGE H. WILKIE, a son of Dr. Wilkie, the medical attendant of the College and an old Collegian, has been admitted as a solicitor.

SINCE our last issue our cricket team have played two matches, both of which they won easily. They defeated the Wesley College in one innings, with ninety-five runs to spare, and the Civil Service in one innings, with sixty-one runs to spare.

THE return cricket match with the Church of England Grammar School is fixed for Monday the 16th instant—too late to be reported in this issue.

Our athletic sports meeting was held on the Melbourne Cricket Ground on Tuesday, 10th instant. A report appears elsewhere. The Old Collegians' Cup was won by A. E. McLennan, and J. J. Armstrong proved himself champion of the College, beating W. J. Bayles by one point.

AT the late athletic sports meeting of the Melbourne Cricket Club several Old Collegians were successful. Messrs. Sandilands, Simson, and McLennan especially distinguishing themselves.

Our Sports Day.

ONCE again we have to record a most successful gathering. Favoured by glorious weather no wonder that the ground was attended by so many eager spectators. The Ladies' Reserve was almost inconveniently crowded, and the Grand Stand presented a gay and animated appearance. It was anticipated that the arrival of the Australian cricketers might prevent a number of people from attending the sports, but so far as one could judge there were fully as many present as on the occasion of our last meeting. The races began at one o'clock, but previous to that time the competition for throwing the cricket ball took place. This event occupied more than its due share of time through the difficulty experienced in measuring the exact distance of the various throws, two especially being remarkably close when measured in a direct line. The winning throw was hardly so good as might have been expected from such a cricketing team as the College now possesses. The race for 100 yards open, which was really the first item on the programme, resulted in an easy victory for Armstrong, in excellent time. The next two races brought a new runner into prominence in the person of the diminutive but agile Marks. He is possessed of remarkable speed, and showed by his after performances that he has also great powers of endurance. He won no less than four races, thus covering himself with glory. If no untoward circumstance intervene he has an excellent prospect of being in future years a worthy successor to Armstrong, the present College champion, who is, as Mr. Hammersley said when presenting him with the Australasian Cup, "the finest runner for a lad that I ever saw." He well deserves the championship of the College, winning as he did no less than four races, each one in very fast time, and against a large field of competitors. Bayles, who comes next to him—being indeed only one point behind him—is also worthy of great praise: his most noteworthy feat was the winning of the mile race

from scratch, the only one to give him trouble being Ellerman, who, by a magnificent spurt, all but altered the result. A report had been industriously spread that one of the competitors in this race, to whom the handicappers had allowed what was considered too liberal a start, was going to win with the utmost ease. But the result justified the handicappers; for at the close of the race the "certain winner" was not to be found. Of the other events the gymnastics and the vaulting were the most interesting to spectators. The lads who took part in the former went through their parts so neatly and carefully as to take away all appearance of danger. In the vaulting only two performed well, Montgomery and Aitken. The result was that Aitken won by a very good vault of 8ft. 8in. Had he not been engaged in further events he might have cleared some inches more, but he determined, and wisely, not to spoil his chance by unnecessary exertion. The walking race was simply a contest between Austin and Woodville, the others having no chance. Of these two the winner was Austin, who walks very fairly; but had Woodville been in the form displayed by him two years since, there is no doubt that the finish would have been closer. The contests for the championship under sixteen were shorn of much of their interest by the absence of Whan; still, Fraser and Anthony both did well. The results of all the races are chronicled elsewhere, but before closing this account one may be allowed to speak of the contests for the Old Collegians' Cup. The winner was McLennan, who ran in excellent style, and was in perfect condition. Most people expected that Sandilands would win; but, as is frequently the case, the general verdict was incorrect. For some reason or other Simson started for one race only. Had he started for the other two he would have pressed McLennan very hard indeed. The experiment was tried, for the first time, of running the 440 yards before the 100 yards, in order to induce a greater number to start for the former, generally the most interesting of the three events. The result, however, was scarcely satisfactory, as not more than seven or eight started.

On the whole, the sports were most enjoyable, not a hitch occurring throughout. They formed a fitting termination to a year of hard work, and, strange to say, both masters and boys seemed to enjoy them more than their usual studies. With the plaudits of our schoolmates still ringing in our ears, with the vision of fair ladies still haunting our eyes, let us away to our well-earned holiday, looking forward with eager and anxious hearts to our next merry meeting.

Cricket.

SCOTCH COLLEGE v. WESLEY COLLEGE.

ON Tuesday, 3rd December, our Eleven played that of the Wesley College, on the Melbourne Cricket Ground, and added a most decisive victory to their already long list. The wicket prepared for the match was, unfortunately, swamped by the bursting of a water-pipe, and another wicket had to be prepared in a hurry, and as a consequence,

was far from being a good one. Our skipper won the toss from Andrews, and, of course, sent them in. Sloman and Stewart were the first to appear to do battle for the Wesley, the bowling being entrusted to McCrimmon and Mackay. Each bowler started with a maiden over. However, in the next two overs Sloman obtained a brace of threes. Stewart was now caught by Taylor, off Mackay, for 2 (1—2—8.) Musgrove filled the vacancy, but only to see his partner bowled by McCrimmon (2—8—13.) Scott was next man, and kept his wicket up, Musgrove doing the scoring; when the score stood at 35, the former substituted his leg for his bat, and paid the penalty (3—1—35.) Turnbull, A., came and went, bowled first ball (4—0—35.) Howard succeeded in making one, when he was bowled by Mackay (5—1—36.) Turnbull, H., became Musgrove's partner, and between them they brought on two changes of bowling, Mackay making way for Melville, who, in his turn, was succeeded by Moore. The change proved beneficial, Turnbull being neatly caught off the second ball, a full pitcher, by Bryan (6—7—54.) Andrews was bowled by Moore for 2 (7—2—62.) Harvey fell a victim to McCrimmon (8—0—63.) Oakley partnered Musgrove, who continued to hit out freely, but luckily succeeding in placing catches just beyond reach of the fieldsmen; in hitting at a full toss, he gave Bryan a difficult chance, who missing it, picked it up and smartly returned it before Oakley could regain his crease (9—2—69.) Monger, last man, was bowled by Moore, after seeing Musgrove bring up 70 on the board (10—0—70.) Musgrove carried out his bat for a vigorously earned 44. On the wicket being rolled, Melville and Mitchell appeared in the van for our Eleven. Off the second ball, by Musgrove, a short pitched bumpy one, Melville was caught off his hand in the slips. 1—0—0 appeared on the board, to the manifest delight of the Wesley partisans. Downes became Mitchell's *vis-a-vis*, and steady play became the order of the day, for rapid scoring was out of the question, the good bowling being greatly assisted by the state of the wicket. Both batsmen were severely struck on the hands and body; notwithstanding, 10, 20, 30, and 40 appeared on the board before Mitchell was bowled off his pads for a well earned 11 (2—11—43.) McCrimmon came in, but at 53 lost his partner, who, in playing a leg-ball, slipped, and much to the surprise of all, was given out l.b.w. by the Wesley umpire. Downes' 27 was obtained by sterling cricket (3—27—53.) Moore and his "*confrère*" raised the score to 77 before the former was caught at square leg, off a bumpy one, for a nicely obtained 12 (4—12—77.) Bryan and McCrimmon brought up 30, and then the former was bowled by Oakley (5—11—107.) Mackay and McCrimmon then treated their opponents to a leather-hunting, till McCrimmon was bowled for 43; three chances can, however, be urged against him (6—43—150.) Taylor did not allow the scorers any respite, and Mackay was evidently endeavouring to make up for former ill luck with the bat; Andrews took the ball to put an end to the scoring, but off his third ball, Mackay scored a five to leg, the fourth ball yielded a three to Taylor, the fifth was sent to the chains for 4, by

Mackay, and the sixth ball added a three to the same batsman—15 off this over. Andrews retired in favour of Musgrove, who shortly succeeded in disposing of Mackay for a brilliant 37 (7—37—178.) Syme filled the vacancy, but soon lost his partner l.b.w. to Musgrove (8—15—187.) Adams appeared, but a separation was soon effected, Syme being bowled (9—4—194.) McCrae hit the third ball he received almost up to the chains, and, in attempting a fifth run, was run out, Adams carrying out his bat for 8. The Wesley commenced their second innings, having 129 to make to save the one-innings defeat. The wickets fell with rapidity, the score standing on the fall of the last wicket (10—0—34.) Mackay and Moore bowled throughout, McCrimmon taking the wickets instead of Mitchell, who hurt his hand in the first innings. Musgrove was again top scorer with 8, and Stewart next with 6.

The game therefore resulted in an easy win for our Eleven by one innings and 95 runs. The following is the score:—

SCOTCH COLLEGE.

Mitchell, b. Oakley	11
Melville, c. Monger, b. Musgrove	0
Downes, l.b.w., b. Harvey	27
McCrimmon, b. A. Turnbull	43
Moore, c. Musgrove, b. A. Turnbull	12
Bryan, b. Oakley	11
Mackay, b. Musgrove	37
Taylor, l.b.w., b. Musgrove	15
Syme, b. Musgrove	4

Won by Scotch College by one innings and 20 runs.

Scotch College and Wesley College.
First Match: Won by Scotch College by 5 wickets and 4 runs.

Second Match: Won by Scotch College by one innings and 95 runs.

Scotch College (15) and Bohemians.

Won by Scotch College by one run.

Scotch College (15) and Civil Service.
Won by Scotch College by one innings and 61 runs.

BOATING (for Sumner Cup.) J. ROBERTSON, *Stroke*

Scotch College and Church of England Grammar School.
Won by Grammar School by two lengths.

PRIZE LIST,

AND

PUPILS ENTITLED TO HONOURABLE MENTION.

This list is made up from the results of the examinations held during the year, and includes the names of all boys who obtained an average number of marks not less than the average obtained by the class, and who have been in attendance for at least two terms. The total number of attainable marks is 1000. The numbers after the names of boys represent the average number of marks obtained by them.

Classics include Latin and Greek. Mathematics includes Arithmetic, Algebra, Geometry, and Trigonometry. English includes Spelling, Dictation, Grammar, Composition, History, and Geography.

Those with an Asterisk (*) prefixed receive prizes.

Time, 2 min. 25 sec.

OLD COLLEGIANS' CUP.

- | | |
|----------------------|------------|
| *1. McLennan, A. E. | 13 points. |
| 2. Sandilands, W. A. | 8 " |
| 3. Gibson, J. C. | 5 " |

The Classes will be resumed after the Christmas Holidays, on Tuesday, 11th February, on which day all the Boys must appear in their places, bringing their Books with them.

The Principal, Vice-Principal, and other Masters will attend at the College on Monday, the 10th February, for the SOLE PURPOSE of Enrolling and Classifying New Pupils; and Parents and Guardians are earnestly requested to assist in this arrangement, by presenting them on that day, so that the ordinary business of the School may afterwards suffer no interruption.
